FOR IMMEDIATE RELEASE

VDS RELEASES SYNAPSE 6.0 for QUANTEL 3.6 at NAB 2007 **Bringing the Power of After Effect Plug-ins to Quantel's Q Range**

New York, NY, April 3, 2007—VDS, a leading developer of broadcast automation software, content design applications and plug-in products, releases Synapse version 6.0 at NAB 2007.

Synapse allows the Quantel Q range operator direct, interactive use of hundreds of professional-grade After Effects plug-ins from within the iQ, gQ, eQ, QPaintbox, and QEffects environments.

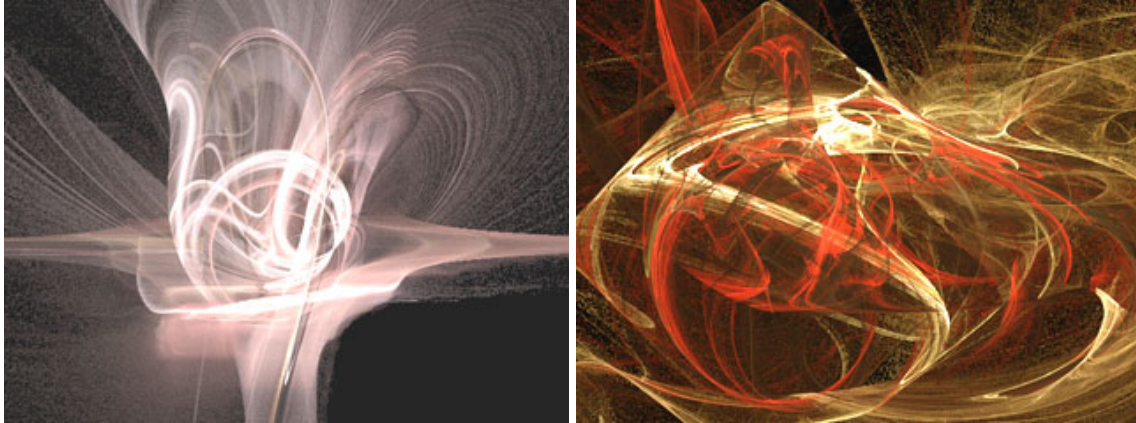

Synapse acts as a transparent translator between After Effects plug-ins and the Quantel environment, giving Quantel Q range operators superior plug-in performance and access to many powerful plug-in collections. Synapse 6.0 now supports latest plug-in versions from Digital Anarchy, Alien Skin, Boris, The Foundry, GenArts, Red Giant Software, DigiEffects, RE:Vision Effects, Panopticum, DFT, Conoa, and Trapcode.

This new version of Synapse now supports Digital Anarchy's Geomancy. Geomancy is a three plugin set that creates and animates lines and shapes. While these common design elements are easy to create, they can be quite tedious to animate. Geomancy makes this process easy with stunning results.

"Synapse has become the essential plug-in package for Quantel customers." comments David-Ray Worthington, Director of Marketing and Product Development at VDS. "This latest version brings even more creative options to the mix."

In addition, for a limited time all Synapse customers who are on support or purchase the Synapse 6.0 upgrade will receive a free Synapse license to enable the use of AEFlame on Quantel. AeFlame is an Adobe After Effects plug in that allows you to create and animate cosmic recursive flame fractals.

AEFlame Fractal Animations
